

NEW!

QUATTRO[®]

100% FLUOROCARBON

with exclusive
QUATTRO
Camo Technology

Four scientifically selected subtle hues of Black, Blue, Green, and Red are patterned in short lengths to break-up the visual impact of Quattro Fluorocarbon underwater, allowing it to blend into the background.

QUATTRO 100% FLUOROCARBON combines HI-SEAS exclusive Quattro 4-color camo technology with fluorocarbon line! The unique coloring process does for fishing line what camouflage clothes do for the hunter – it breaks up visual patterns making the line blend into its surroundings. Four scientifically selected colors are alternated along the fluorocarbon reducing light transmission and creating a whole new level of invisibility. The line is smooth and supple, and is the best handling fluorocarbon yet! Now you can increase your line and leader rating without sacrificing stealth or fishability!

Quattro 100% Fluorocarbon Line
